

This data submission, NCT00433511-D6, contains the data used to generate the results in PubMed ID PMID: 24584876; PMCID: PMC4334112, a non-primary publication from trial NCT00433511.

Data from this trial’s primary publication is found in NCT00433511-D1, NCT00433511-D2, and NCT00433511-D4. Data that are identical to those presented in NCT00433511-D1 are not duplicated here in this submission for NCT00433511-D6.

This dictionary file is for dataset: NCT00433511-D6-Dataset.csv.

Note Coding: 9999=not applicable

Notes General:

Determination of CRA12 and CRA18 in this dataset for PMID: 24584876 was based upon self-reported menses date.

This publication, PMID: 24584876, used baseline and outcome data from early 2013.

This trial’s primary publication, PMID 30040523, used baseline and outcome data from early 2014, therefore further data cleaning (which could include receipt of delinquent data) was performed prior to publication of PMID 30040523. One example for this dataset includes the racecat variable in this submission for PMID 24584876. Following the publication of PMID 24584876, further data cleaning was performed for the baseline race variable which was ultimately used in this trial’s primary publication (PMID 30040523).

Data provided here can be used to approximate published study findings, but exact reproduction of previous manuscripts may not be possible in some cases (e.g., when data must be modified for de-identification purposes or have undergone further data cleaning).

Variable name	Variable Description	Coding of categorical variables
protocol_number	Protocol Number	
groupuid	Unique patient ID (blinded)	
bmi_step1	BMI at baseline (pre-treatment) in parent trial NCT00433511 (kg/m ²)	
amhn	Anti-Mullerian Hormone at baseline (pre-treatment) in parent trial NCT00433511 (ng/mL)	
racecat	Indicator variable for race	0=other
		1=white
txbev	Assigned to a bevacizumab containing arm in NCT00433511	0=no
		1=yes
tamuse	Indicator variable for tamoxifen use	0=no
		1=yes

cra12	Chemotherapy-related amenorrhea at 12 months post randomization to parent trial NCT00433511	0=no
		1=yes
cra18	Chemotherapy-related amenorrhea at 18 months post randomization to parent trial NCT00433511.	0=no
		1=yes
