NCT #:	NCT00499616			
Dataset #:	D1			
PMID #:	30444686			
Comments:	There is one row for each stage 4S patient enrolled on ANBL00B1. The dataset provided, when used with other datasets submitted under this NCT number, supplies the information necessary to reproduce patient baseline characteristics, survival, and other results of the manuscript. Blanks and '.' represent missing data or not applicable for analyses. Data can be used to approximate published study findings, but exact reproduction of previous manuscripts may not be possible in some cases (e.g., when data must be modified for de-identification purposes or have undergone further data cleaning).
