

NRG Oncology/RTOG-0534 Data Dictionary for NCT00567580-D2-Dataset.csv

PMID: 35569466

Note #1:

Data can be used to approximate published study findings, but exact reproduction of previous manuscripts may not be possible in some cases (e.g., when data must be modified for de-identification purposes or have undergone further data cleaning).

Note #2:

Adverse events (AE) were scored with Common Terminology Criteria for Adverse Events version 3.0 (CTCAE v3.0).

Note #3:

This dataset provides the highest-grade adverse event, by subject and category.

Note #4:

This dataset represents subjects who started protocol treatment and were evaluated for adverse events. Subjects with no reported adverse events will not appear in this dataset. The denominator comes from companion dataset NCT00567580-D1-Dataset.csv (has_ae_data=1 and treated=1).
