This dictionary file is for Dataset NCT00887159-D2-Dataset.csv.

Data can be used to approximate published study findings, but exact reproduction of previous manuscripts may not be possible in some cases (e.g., when data must be modified for de-identification purposes or have undergone further data cleaning).

Note: AE dataset contains the data from an individual in multiple rows. The worst grade of the same AE for the same patient was used in tabulating Table 2 in the publication paper.

In the published paper Table 2, 86% Arm C patients with hypokalemia and 124% Arm C patients with hyponatremia should be 6% and 12%, respectively.

Variable Name	Variable Description	Codes
ID	A blinded ID generated by ECOG-ACRIN	
type	ECOG-ACRIN internal toxicity code	
grade	Adverse event grade, per CTCAE version 4	3 = grade 3 4 = grade 4 5 = grade 5
TXARM	Treatment arm	A = Arm A B = Arm B C = Arm C
toxlabel	Toxicity name
