

Dictionary for dataset NCT00980460-D3-Datset.csv

Dataset NCT00980460-D3-Datset.csv provides data on the nausea and peripheral neuropathy observed during the first cycle (the first part of the first sentence and all of the second sentence of the "Toxicity" subsection). Only patients who are contributed to the analysis, that is, those with analysiset = 1, are represented in the dataset. For each patient, only cycles 1&2 nausea and neuropathy toxicities are represented in the dataset.

For various reasons, data may contain slight discrepancies from that reported in the publication

variable number (column designator)	variable name	variable type	variable label	note
1 (A)	usi	character	Patient identifier	
2 (B)	tox_nausea	character	Nausea reported during treatment cycles 1&2	
3 (C)	tox_peri_sensory_neuropathy	character	Peripheral sensory neuropathy reported during treatment cycles 1&2
