

Study Number:	ANBL0931			
NCT #:	NCT01041638			
Dataset #:	D2			
PMID #:	29967609			
Comments:	<p>These data provide specific incidence of adverse events of interest and there is one row for each adverse event reported on ANBL0931. The following variables are used as a flag: table2_unaccept_tox. It is sorted by USI. Missing data in the table2_unaccept_tox and ae_duration variables are indicated as blank, and as such, not applicable/not used in the analysis. Data can be used to approximate published study findings, but exact reproduction of previous manuscripts may not be possible in some cases (e.g., when data must be modified for de-identification purposes or have undergone further data cleaning).</p>
