

This dictionary file is for Dataset NCT01642251-D2-Dataset.csv.

Data can be used to approximate published study findings, but exact reproduction of previous manuscripts may not be possible in some cases (e.g., when data must be modified for de-identification purposes or have undergone further data cleaning).

Note: AE dataset contains the data from an individual in multiple rows. The worst grade of the same AE for the same patient was used in tabulating Table 3 in the publication paper.
