

This dictionary file is for Dataset NCT01863550-D4-Dataset.csv				
Data can be used to approximate published study findings, but exact reproduction of previous manuscripts may not be possible in some cases (e.g., when data must be modified for de-identification purposes or have undergone further data cleaning). The data in variables <i>toxlabel</i> and <i>grade</i> are furthered cleaned/QCed since the analyses performed in the corresponding publication (32866432) and they represent the most accurate information.				
This dataset corresponds to information in Lancet Oncol. 2020 Oct; 21(10): 1317-1330
