

Data dictionary for NCT02048813-D2

This file includes grade 3 and above adverse events regardless of treatment attribution. Corresponds to Table 2.

Data can be used to approximate published study findings, but exact reproduction of previous manuscripts may not be possible in some cases (e.g., when data must be modified for de-identification purposes or have undergone further data cleaning).

Notes:

1. Safety results should say that hemorrhagic events of grade 3 or higher occurred in 5 patients (four grade 3 and one grade 4) in the IR arm.

Variable	Description	Value
caseid	Unique blinded ID for each patient	Integer up to 7 digits
toxname	Toxicity name	Character string
worstgrade	Worst grade regardless of treatment relation	3, 4, 5
